

SQL DEVELOPER

TASK-3

Description:

The intern will learn SQL Joins such as INNER JOIN, LEFT (OUTER) JOIN, RIGHT (OUTER) JOIN, FULL (OUTER) JOIN, CROSS JOIN.

Responsibility:

1. Create Tables:

- Define table structure using the CREATE TABLE statement.
- Specify columns and their data types.

2. Insert Values:

- Add records to the tables using the INSERT INTO statement.

3. Use Joins to Retrieve Data:

- Combine data from multiple tables using join clauses.
